

POSSIBLE PROJECT TIMELINE

The project schedule is based on the project start date. Any change in start date would result in changes in all subsequent delivery dates. The actual project schedule along with detailed planning is subject to further consultation with the client. The website design should take between 4-8 weeks to complete.

PHASE I: RESEARCH

1–2 WEEKS

Consultation with project leader to finalize details and roadmap.

Content research or researcher is not provided by developer nor translation services.

PHASE II: DEVELOPMENT FOR SITE

1–2 WEEKS

Taking supplied content design website around it.

Development on local in-house environment.

PHASE III: DESIGN DEVELOP. & REVIEW

2-4 WEEKS

Installing site on staging server for client.

Usability checklist focus group.

Incorporation any remaining content resources and agreed upon corrections from client.

Modifying and testing of finished site. Last phase no further input until live.

PHASE IV: POST DEVELOPMENT

3 DAYS

Client staff training and producing of training videos.

Website launch.
